FEATURE BREED FOR 2025

WHITE SUFFOLK

The White Suffolk is an Australian sheep breed developed for Australian conditions. As leading prime lamb sires, White Suffolks are versatile performers and are well noted for their functional shape, mobility, fertility and libido. The breed's performance and productivity is also backed confidently by objective selection and science.

White Suffolks adaptability make them ideal for use in wide-ranging environments. The breed continually produces outstanding results in dry, arid and pastoral zones, all types of agricultural and mixed farming areas and also in higher rainfall districts. With the tough seasonal conditions across the country this makes them an excellent choice to maintain consistency and good returns in prime lamb production systems.

Fleece weights from mature ewes are between five and eight pounds (2.3 and 3.6 kilograms), with a yield of 50 to 62 percent. The fleeces are considered medium wool in type, with a fibre diameter of 25.5 to 33 microns and a spinning count of 48 to 58. The staple length ranges from 2.0 to 3.5 inches (51 to 89 mm)
